DUNCAN'S COMMENTS:

A fair medium sized market during the 1970's Charlotte had become a fine large radio market by the mid-90's. When I began gathering this data in the 70's I would have never imagined that Charlotte would become a hundred million dollar market by the end of the century. It is also important to note that the number of new viable stations has been comparatively low.

The downside to the market is the rapid decline in radio listening in Charlotte. This has been true in all radio markets but it seems particularly dramatic in Charlotte. Also of note is the sharp increase in listening to non-commercial stations (see the "Unlisted Station Listening" column). Charlotte's 22.9% figure is one of the highest in the nation. This number will only increase as satellite radio gains listeners and listening.

It is difficult to select one outstanding station for Charlotte. WBT and WSOC were good candidates but their audience shares have declined so much in the last decade that they were ruled out. WNKS has become a major property after almost disappearing from sight in the early 90's. Probably the most consistent station in both revenue and ratings has been WRFX.
