DUNCAN'S COMMENTS:

Greenville-Spartanburg has been an excellent medium-sized radio market. Most indicators have been very positive especially the number of viable stations. The only negatives are Average Person Ratings and the amount of listening to unlisted stations. These indicators of commercial radio's health are negative in almost all radio markets. It is now just a matter of how much worse some markets are relative to other markets.

Picking an outstanding station in Greenville-Spartanburg is difficult. The ratings for most stations have flattened over the years. In revenues WSSL has been the leader for the last decade. Note how healthy the top seven stations have been in revenues over the last seven or eight years. The larger the tier at the top of the revenue rankings the better. It is a sign of a good radio market.
