DUNCAN'S COMMENTS:

West Palm Beach is an above average medium size radio market. Revenues have grown over 500% (1980 to 2000). The number of viable stations is low for a market of this size. This is true despite a number of FM's moving into the market during the last decade.

WEAT and WRMF have been the leaders in West Palm over the last thirty years. WEAT took a ratings hit in 1992 when it evolved from EZ to a very Soft AC. Since then WEAT has been strong and steady. Note the peak in WIRK's ratings from 1978 to 1982. That particular period was when Country music nationally was also at an apex.
